

CRONIC ENDOCANNABINOID DEFFICIENCY (CECD)

The human body has many CBD receptors and produces its own CBD. However the body must depend on outside sources to keep the CBD receptors active and functional. We have found that Premium Grade Hemp CBD Oil combined with CAVINOL Booster restores and replenishes the CBD receptors quickly and effectively and allow the body to provide the necessary terpene combinations to support the various conditions and ailments that occur when the endocannabinoid system is not properly supported. This contition is call **CHRONIC ENDOCANNABINOID DEFICIENCY (CECD)** and occurs in millions of people worldwide.
